Context Diagram

Level 0: system context

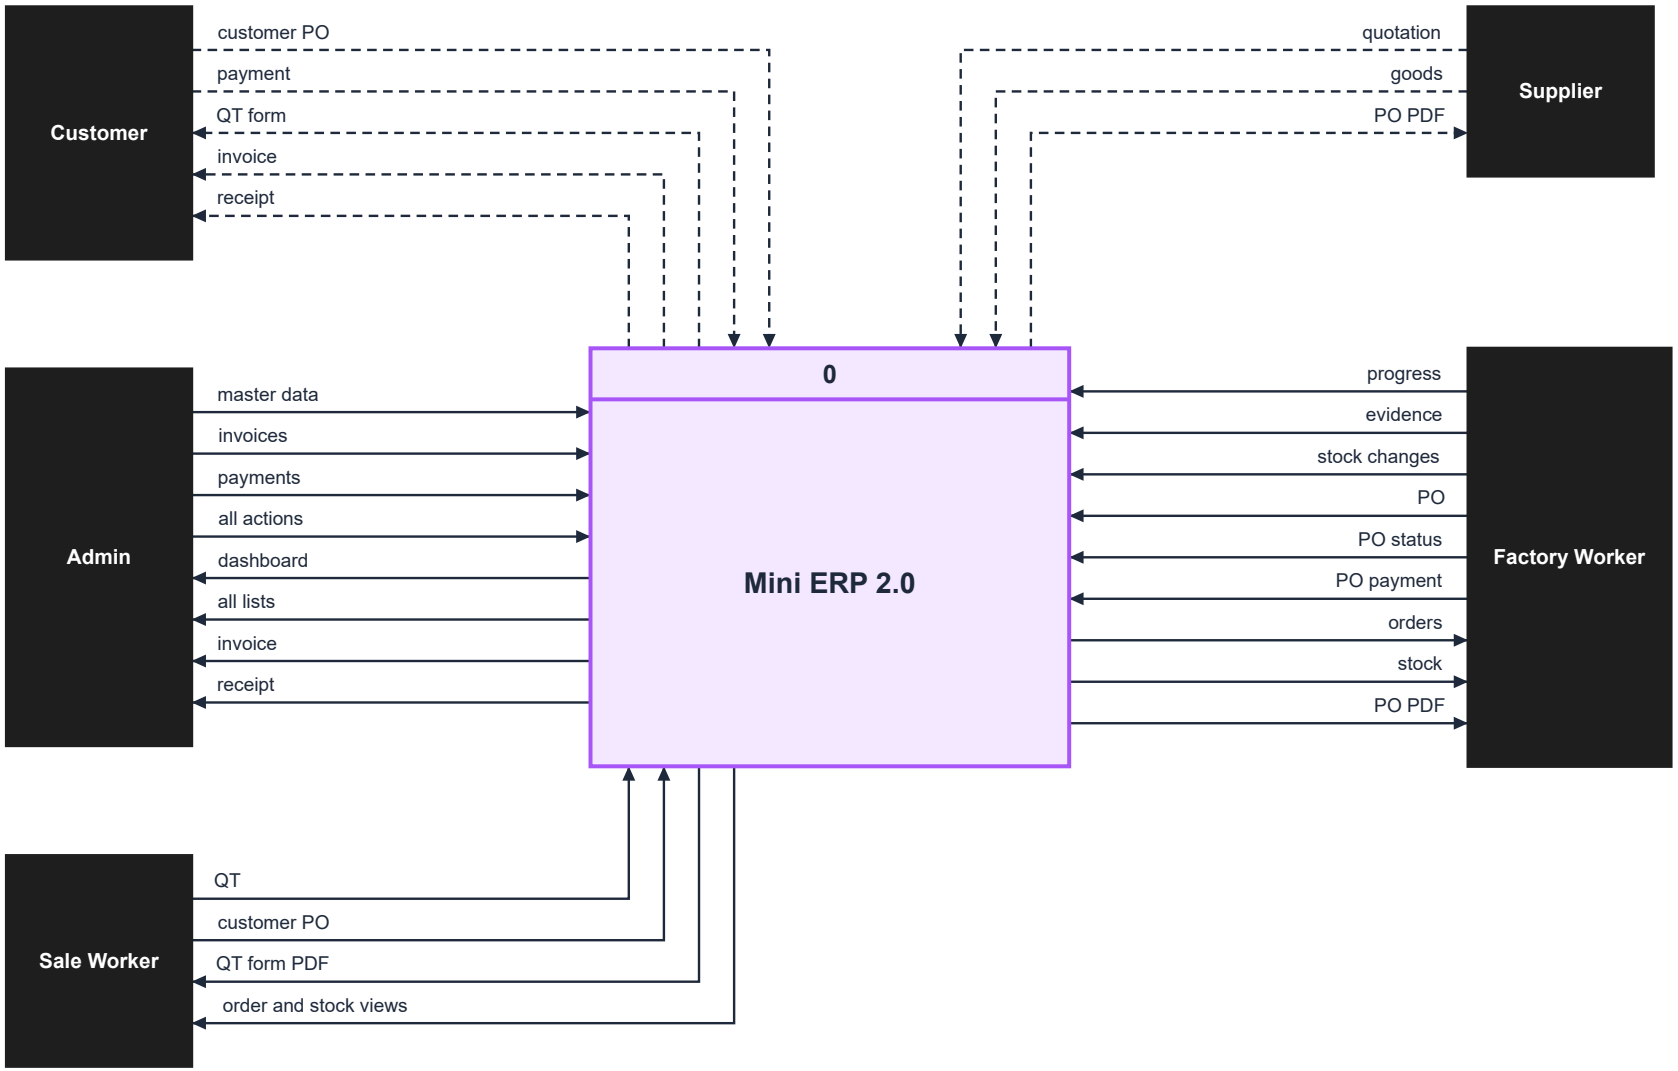

Figure 1. Level 0: system context (data flow diagram; dashed lines: handed over by users)

Level 1: inside the system

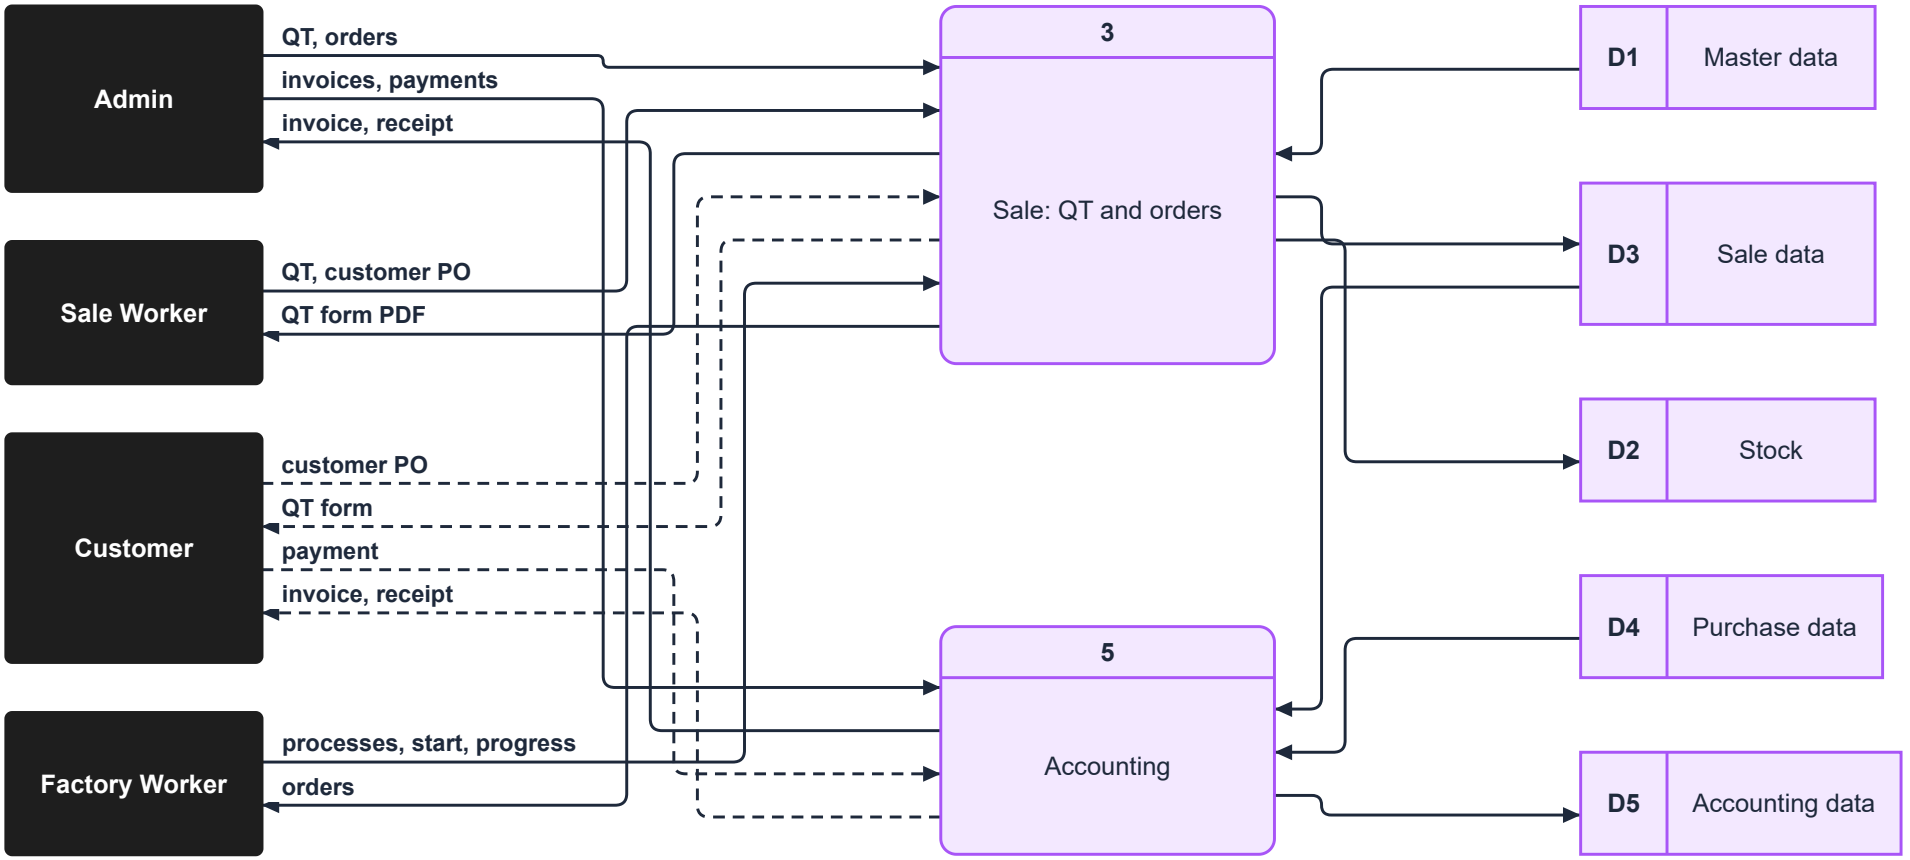

Figure 2. Level 1: Sale and accounting (processes 3 and 5)

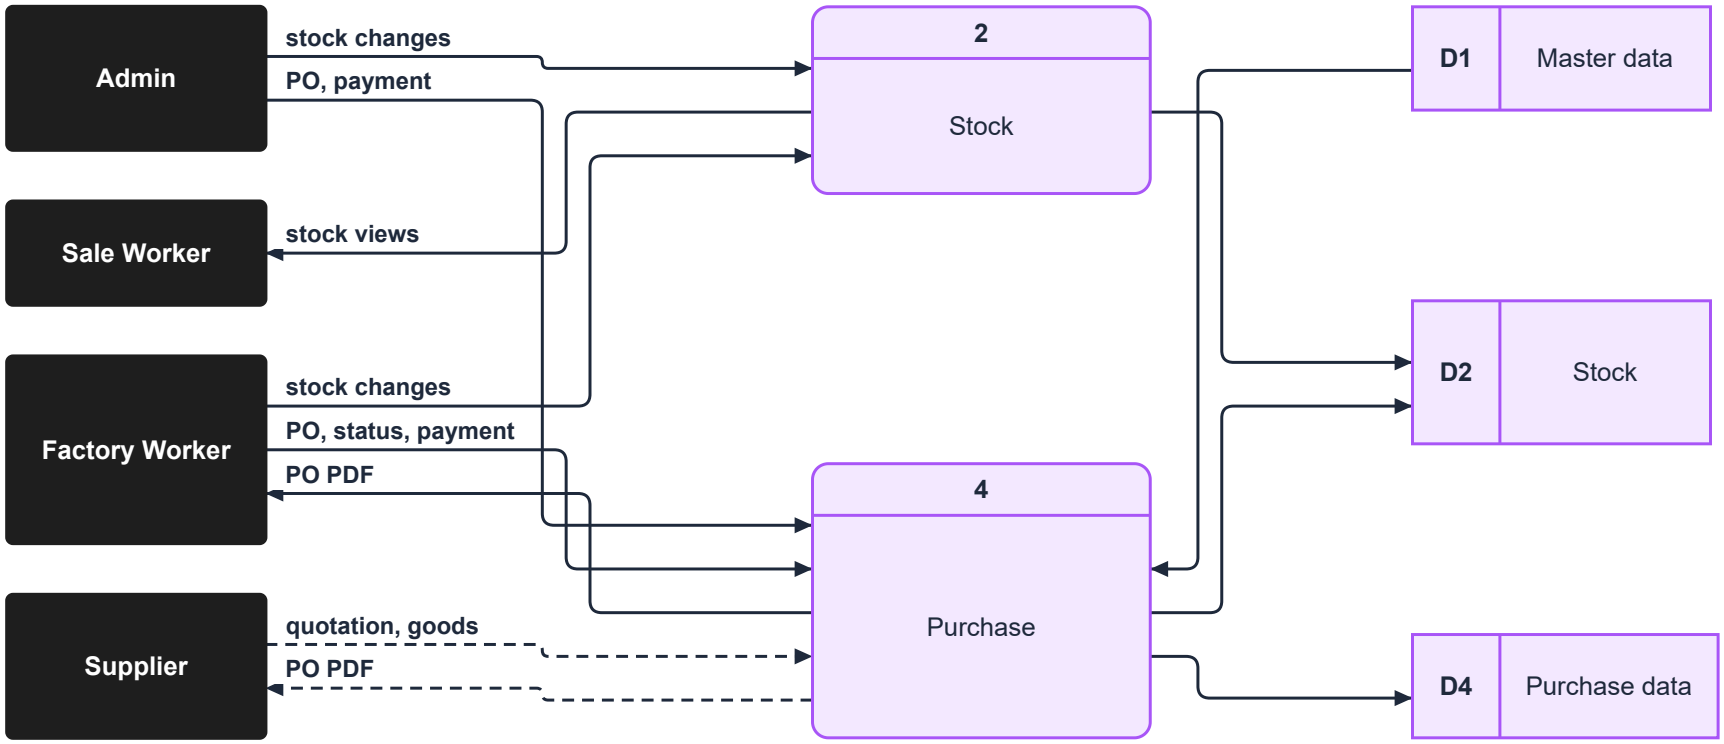

Figure 3. Level 1: Stock and purchase (processes 2 and 4)

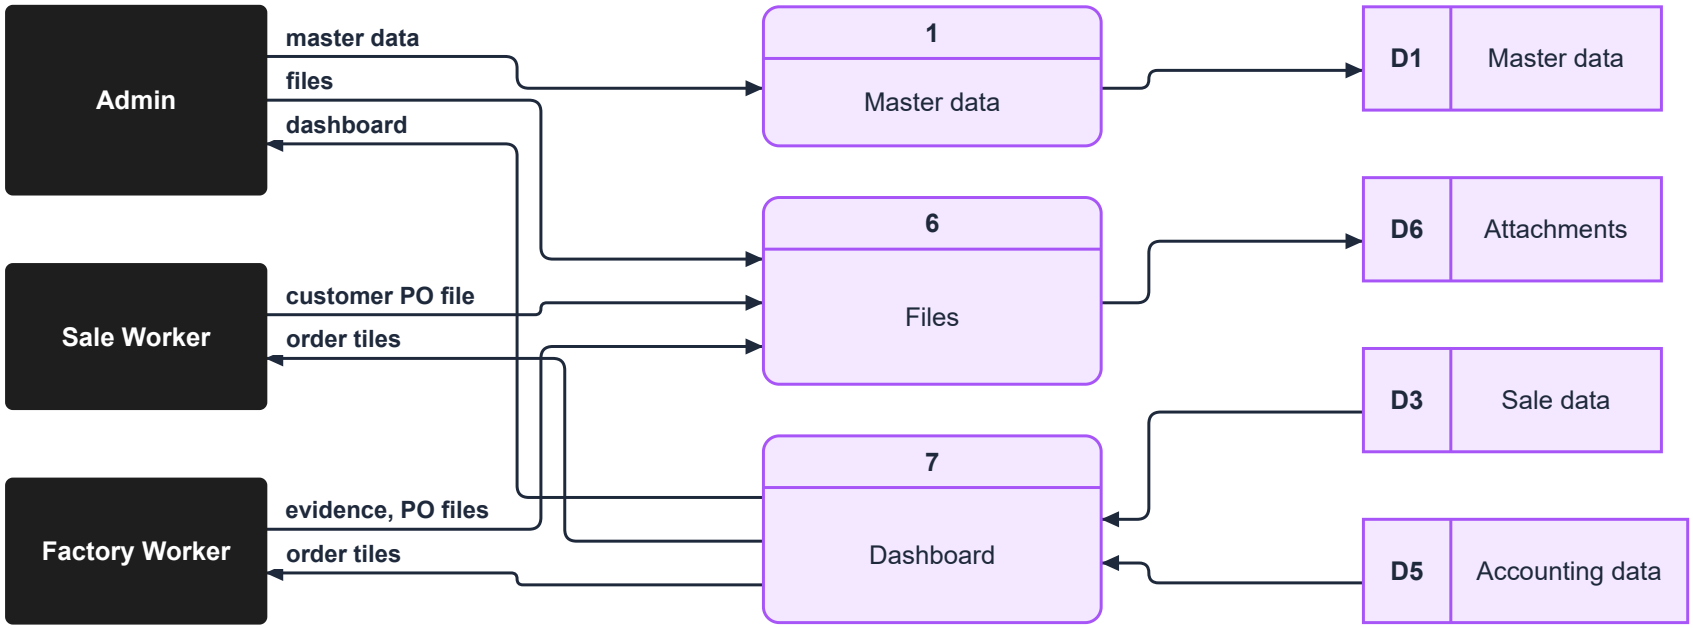

Figure 4. Level 1: Master data, files and dashboard (processes 1, 6 and 7)

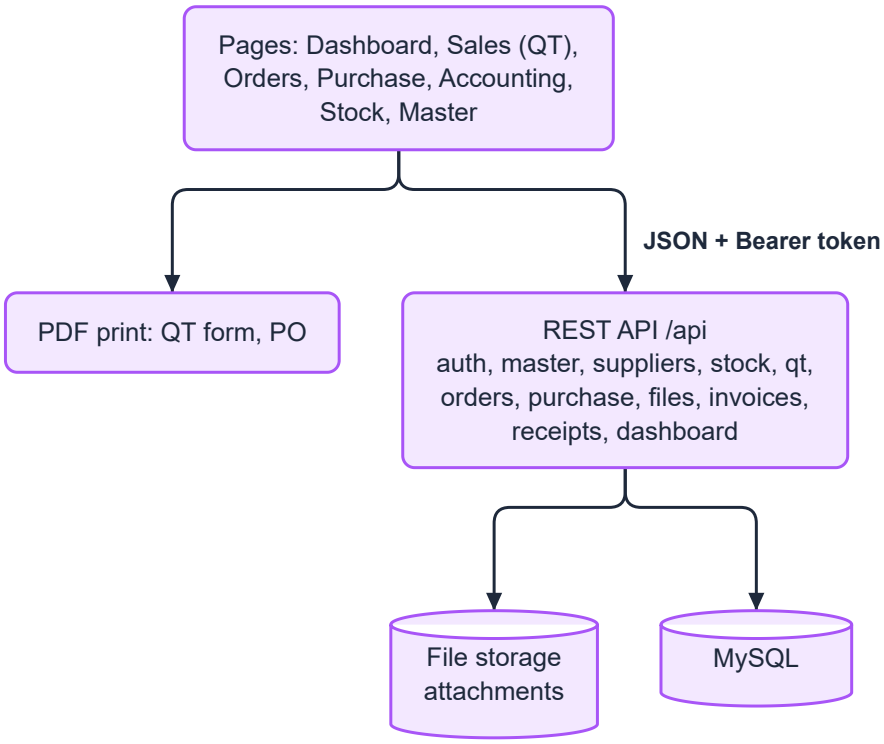

Figure 5. Level 1: architecture (frontend: pages, PDF print; backend: REST API, file storage, MySQL)

External entities

Entity	Gives the system	Gets from the system
Admin	master data, invoices, payments, any action	all pages, invoice and receipt
Sale Worker	QT, customer PO file	QT form PDF, order and stock views
Factory Worker	progress, evidence files, stock changes, PO and its status and payment	orders, stock, PO PDF
Customer (outside)	customer PO, payment	QT form, invoice, receipt (handed over by users)
Supplier (outside)	goods, quotation	PO PDF (handed over by the user)

Data stores added in Version 2.0

Store	Content
Purchase data	suppliers, supplier items and prices, POs, PO lines, PO payments
Attachments	PO files, quotations, production evidence, other documents

Not in this system

Sales orders, delivery, supplier invoices, serial numbers and tax. (The Accounting page also lists the received purchase orders that wait for payment and the ones that are paid; the payment is recorded on the PO.)
