Flow Chart

Main flow

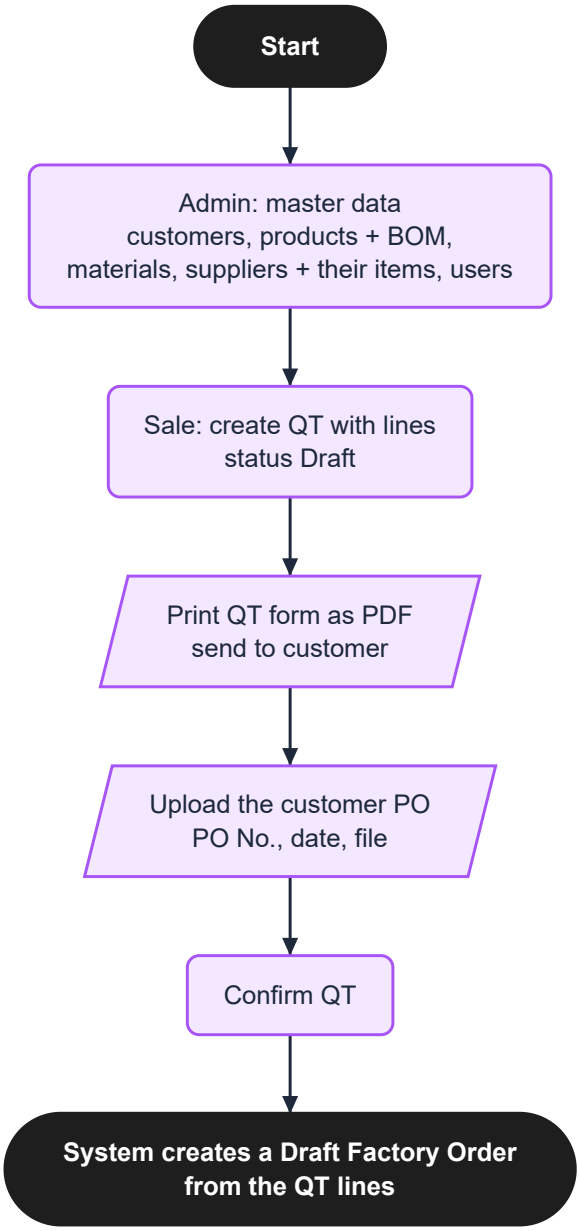

Figure 1. Main flow (1 of 2): from master data to the Draft order

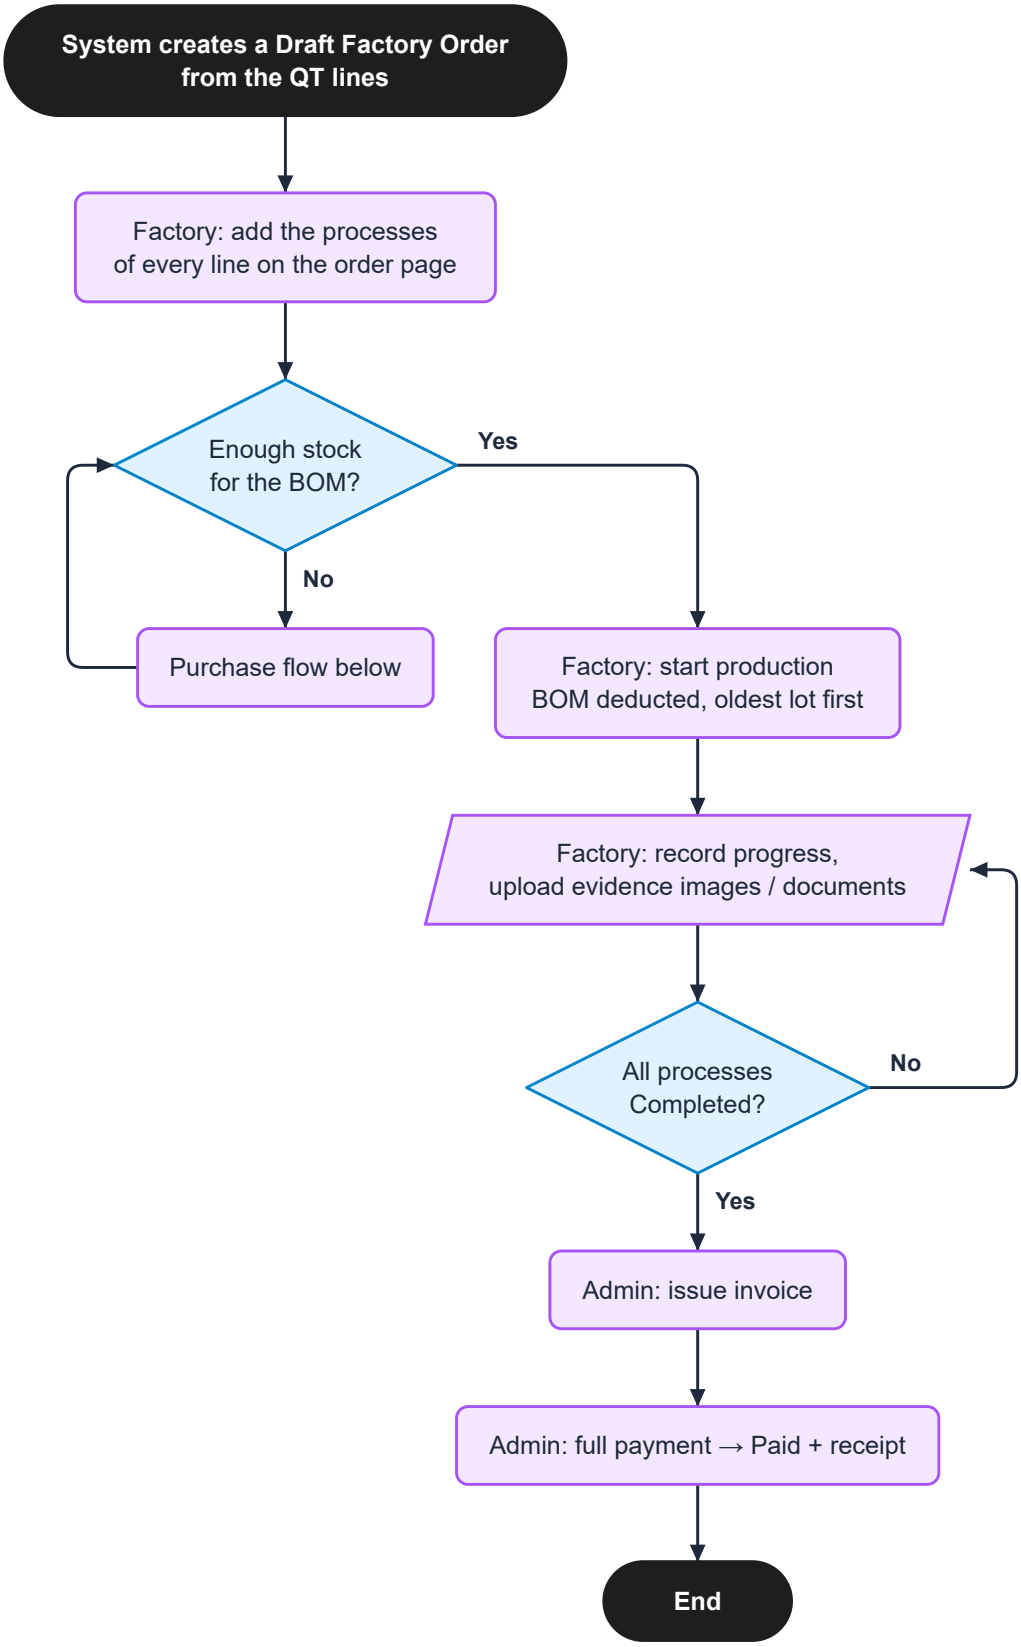

Figure 2. Main flow (2 of 2): production, invoice and payment

Purchase flow

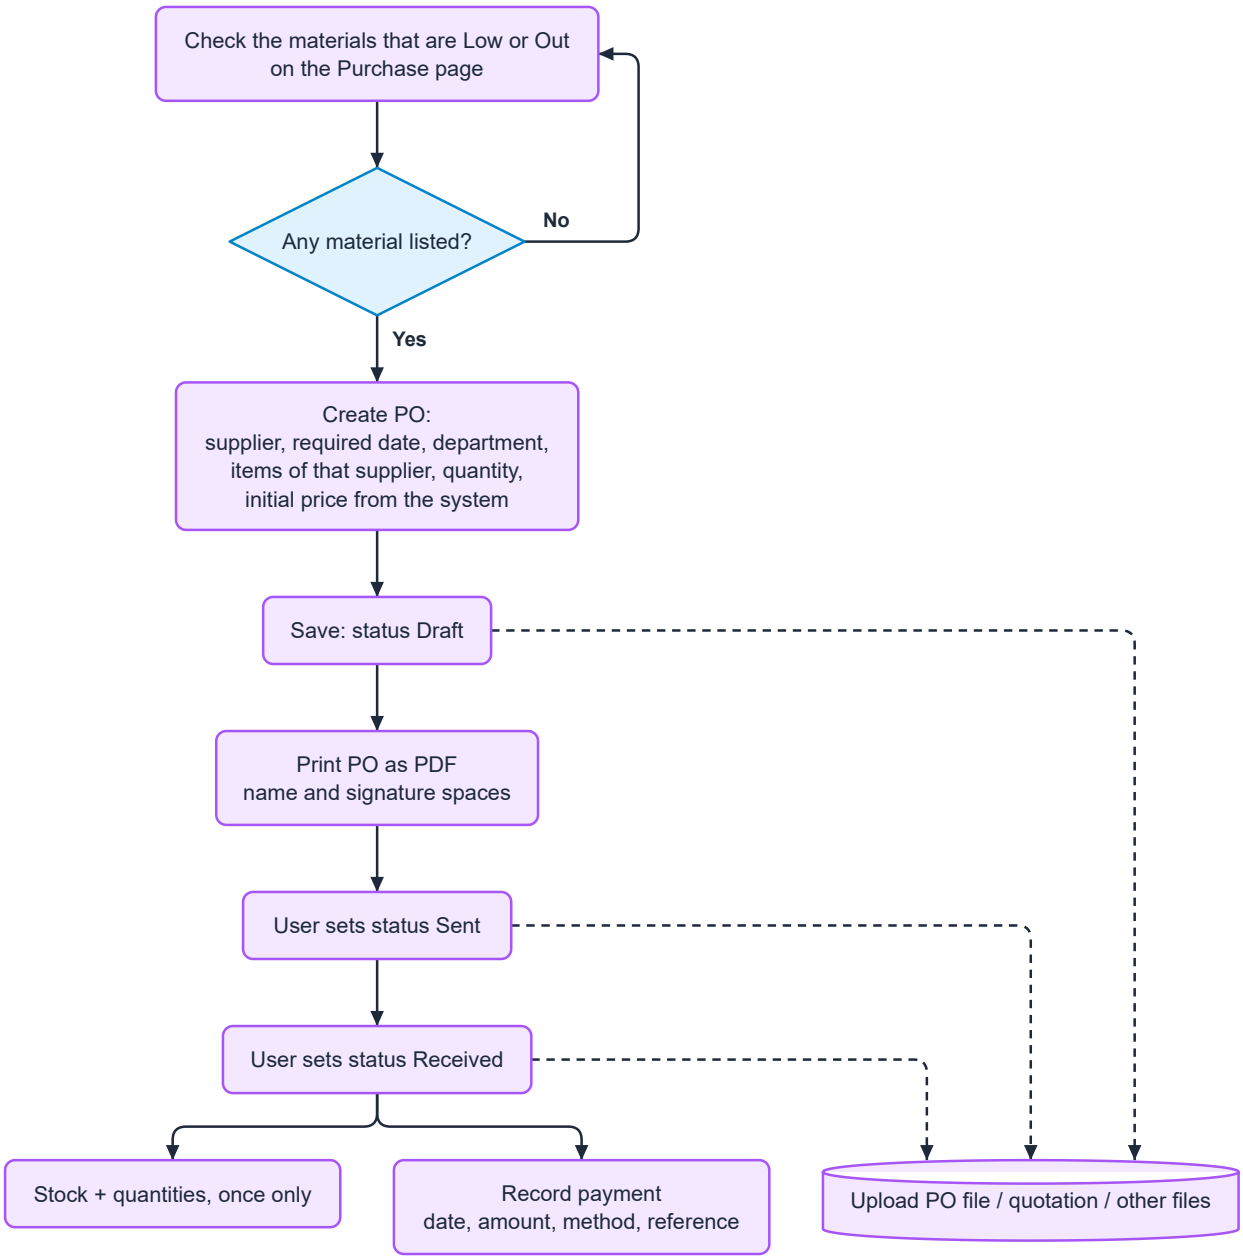

Figure 3. Purchase flow

PO status

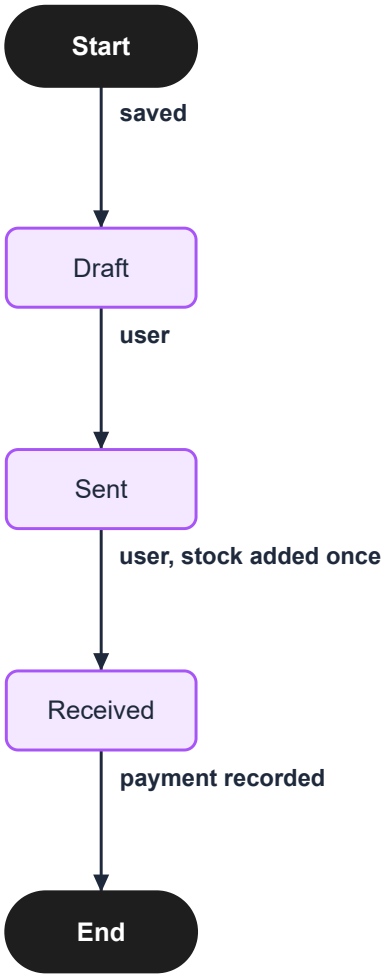

Figure 4. PO status

Lines can be edited only in `Draft`. A `Draft` PO can be deleted.

QT status

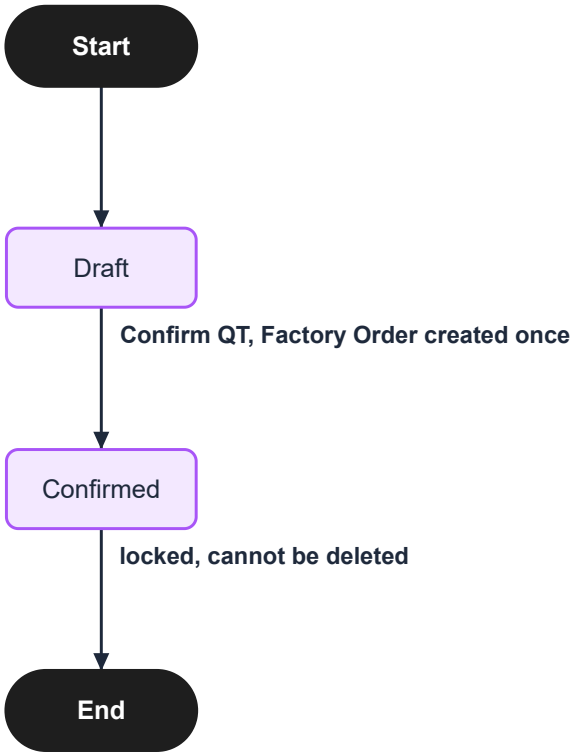

Figure 5. QT status

Order status

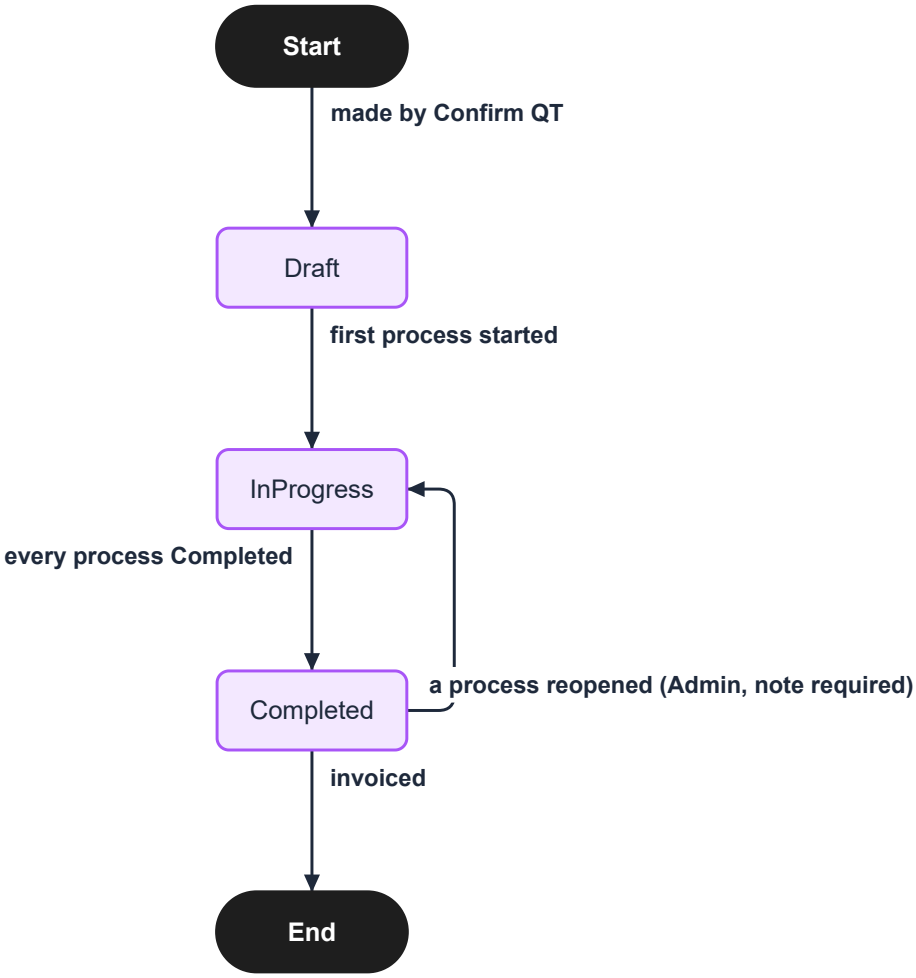

Figure 6. Order status

The status of an order is computed from its processes, not set by hand. `Draft` also covers an order that was started but has no progress yet (the page says "Production started").

Process status

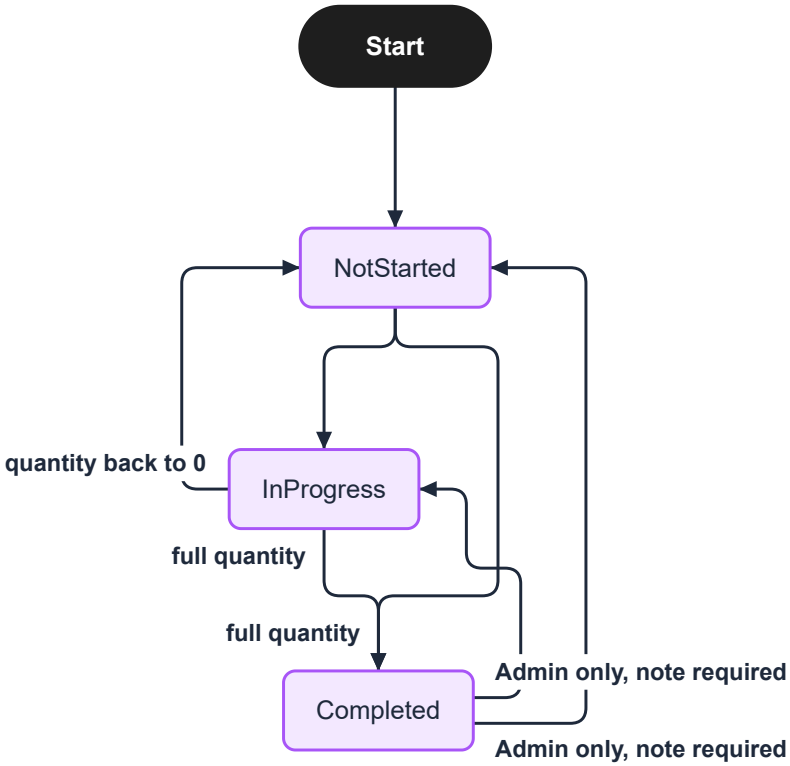

Figure 7. Process status

Not started means quantity 0, Completed means the full quantity of the line, In progress is anything between (the quantity can grow while the process stays In progress).

Invoice status

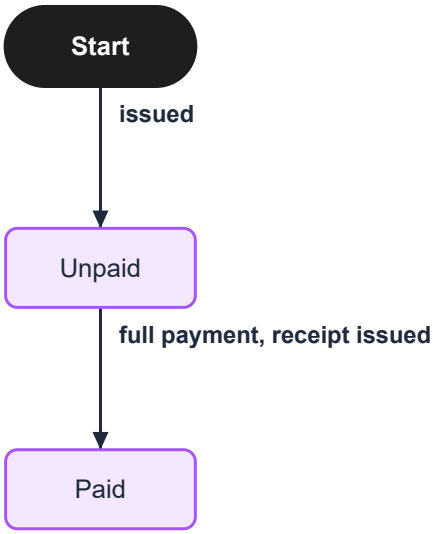

Figure 8. Invoice status

Stock changes
